

EXCHANGES MADE IN FUERTEVENTURA

It is a Project which will be carried out by the group **4º ESO B** at **IES LA OLIVA** during the school year 2017/18. This Project was created by **JOSÉ MANUEL CABRERA SUÁREZ** and **MARÍA CAROLINA RAMOS GONZÁLEZ** but it will be put into practice by **DAVID SOLA ENCINAS** Geography and History teacher and **MARÍA CAROLINA RAMOS GONZÁLEZ** English teacher.

“EXCHANGES MADE IN FUERTEVENTURA” consists in spreading the image of Fuerteventura abroad, in the rest of Spain and even in the Canary Islands. Due to this fact, our students will visit, through an Exchange Programme, other high schools located out of the island to present the cultural and environmental heritage that Fuerteventura offers. At the same time, students from other countries will also present in our island their heritage using English as the language of communication among them.

The use of ITCs in this Project is important because the students will have to create Power Points presentations, a blog, a website and video recordings which will help them to improve their digital competence. At the same time, they will be able to improve their creativity and language competence because they will ameliorate their oral and writing expression in English and Spanish. Doing research into their cultural, historical and environmental heritage will help them to develop other important abilities.

“EXCHANGES MADE IN FUERTEVENTURA” gives us the opportunity to cooperate with other European high schools. So, students will be able to spread different historical, cultural, gastronomic, sport, environmental aspects through the website, which will be created and control by the students, the blog, the use of emails and video conferences as a mean of communication among them. Our goal is that people start to know Fuerteventura better.
